Software Engineer with frontend experience in React, Next.js, and TypeScript, plus hands-on backend work in PHP and CodeIgniter. Built banking, insurance, transaction, and mobile features for projects at **Indonesia Financial Group (IFG)**, **Bank Raya**, and **Bank Rakyat Indonesia (BRI)**, and contributed to Borneojek web and mobile products.

Technical Skills

Languages: TypeScript, JavaScript, PHP, SQL

Backend & APIs: Node.js, Express.js, CodeIgniter, REST APIs, server actions, API routes

Data & security: MongoDB, PostgreSQL, authentication, sessions, cryptography

Frontend: React, Next.js, Svelte, Flutter, Tailwind CSS

Testing & tools: Jest, Testing Library, MSW, Cypress, Playwright, deployment workflows, Google Analytics, Nx, Git, GitLab, Bitbucket, Jira, Composer, Midtrans

Professional Experience

Frontend Engineer

Negeri Emas Perkasa

Jan 2026 - Present

- **IFG | LifeHub:** Developed typed React/Next.js insurance workflows, RTK Query services, CRUD forms, filters, pagination, document uploads, PDF generation, and Jest tests.
- Refactored complex UI into reusable configurations, hooks, and interfaces, with session tracking for auditability.

Frontend Developer

Talent Tech

Sep 2024 - Jan 2026

- **Bank Raya | Cash Management:** Developed company onboarding, fund transfers, transaction history, and single/mass virtual-account workflows with API integration and approval states.
- Implemented and tested virtual-account create, detail, list, upload, download, validation, history, pagination, and approval flows in Next.js/TypeScript.

Frontend Developer

Ordent

Jun 2023 - Sep 2024

- **BRI | QLola Cash Management:** Developed company, user, role, account, task, and trade-finance workflows using API-integrated forms and tables.
- Implemented permission/approval flows, bulk imports, report downloads, OTP actions, filtering, pagination, and shared UI components in an Nx/Next.js monorepo.

Freelance Software Developer

Borneojek

Oct 2022 - Nov 2023

- **Borneojek web panel and mobile applications:** Contributed to merchant and customer workflows across web and mobile products.
- Worked on PHP/CodeIgniter backend services with SQL-backed data flows, API functionality, and Midtrans payment integration.

Frontend Developer

Client project work (including R17 Group)

May 2021 - Jul 2022

- **Projects for R17 Group, Samsat Digital Nasional, and seven company profiles:** Built responsive websites and landing pages with SEO improvements. I also supported Google Analytics work in the marketing division.

Selected Projects

PekerjaMigran.com | Dec 2024 - Nov 2025 - Marketplace built with Next.js, tRPC, Drizzle, and PostgreSQL.

One Retail CMS | Aug 2023 - Sep 2023 - Full-stack landing page and CMS built with Next.js, MongoDB/Mongoose, and Tailwind CSS.

Education

Brawijaya University

2023

Bachelor's Degree | Informatics Engineering | GPA 3.58
